## 2026 RACE CYC MSRP \$4499\*\*

The **RIF RACE** was born from a simple question: *Why can't e-bikes perform like real bikes?* We wanted a bike that keeps you connected to the road, where you can feel every curve, every shift in the wind, and every heartbeat of the climb. So we tore the concept apart and started over. Frames were stripped down, motors were rewired, geometry was rebuilt, and prototypes were pushed to the limit. Our shop became a laboratory and every group ride became real-world testing. The result is the **RACE**—a performance-driven e-bike engineered to deliver the speed, precision, and raw riding experience serious cyclists demand.
